

LIST OF DUTCH CERTIFIED INSTALLERS OF TANK INSTALLATIONS BRL SIKB 7800

Tank installations

Based on the process certification scheme “Tank installations” (BRL SIKB 7800) Kiwa has issued a process certificate to the companies listed below for the design, installation, modification, (re)classification, inspection and repair of tank installations for liquids and vapours,

The process certificate has a number of main and sub-areas with their specific areas of application. Per certificate holder/company is indicated for which main and/or sub-area it is certified and these are:

Main areas

- A. Installation and maintenance of underground tank installations for PGS-Class 1 and Class 2 products - PGS 28
- B. Installation and maintenance of underground tank installations for PGS-Class 3 and Class 4 products - PGS 28
- C. Installation and maintenance of underground tank installations for chemical products as defined in PGS 31
- D. Installation and maintenance of above ground tank installations for PGS-Class 3 and Class 4 products - PGS 30
- E. Installation and maintenance of above ground tank installations for PGS-Class 2 products - PGS 30
- F. Installation and maintenance of above ground tank installations for chemical products as defined in PGS 31

Sub-areas

- 1. Soil resistance measurements and design of cathodic protection (Mg-anode)
- 2. Thermoplastic piping systems
- 3. Flexible metal piping systems
- 4. Leak detection systems
- 5. A) Elektronik level gauging systems
B) Elektronik level monitoring measuring systems
- 6. A) Steel pipes with welded joints
B) Plastic pipes with welded joints
- 7. Pressure pipes underground
- 8. Pressure pipes above ground
- 9. Design of tank installation in the (petro)chemical industry
- 10. Tank installations (semi) underground building
- 11. A) Fabrication of steel fill point spill containers
B) Fabrication of plastic fill point spill containers
- 12. Underground tanks of Glass-reinforced plastic (GRP)
- 13. Pipes, underground of Glass-reinforced epoxy (GRE)
- 14. Tank installations for pontoons
- 15. (Re)classification of above ground steel installations
- 16. (Re)classification of above ground plastic installations
- 17. Installation of underground pipes for main areas D, E or F

BRL SIKB 7800 version 01 is valid from 1 October 2018.

THIS OVERVIEW IS UPDATED ONCE PER QUARTELY.

For information, please contact the Client Support Center,
via tel. +31 88 - 9984555 or via nl.support.ai@kiwa.com.

Main areas

- A. Underground tank installations PGS-Class 1 and Class 2 - PGS 28
- B. Underground tank installations PGS-Class 3 and Class 4 - PGS 28
- C. Underground tank installations chemical products - PGS 31
- D. Above ground tank installations PGS-Class 3 and Class 4 - PGS 30
- E. Above ground tank installations PGS-Class 2 - PGS 30
- F. Above ground tank installations chemical products - PGS 31

Sub-areas

- 1. Soil resistance measurements and design of cathodic protection
- 2. Thermoplastic piping systems
- 3. Flexible metal piping systems
- 4. Leak detection systems
- 5. Level gauging (A) - and level monitoring measuring systems (B)
- 6. Welded joints steel pipes (A) and plastic (B)
- 7. Pressure pipes underground
- 8. Pressure pipes above ground

- 9. Design of tank installations in the (petro)chemical industry
- 10. Tank installations (semi) underground building
- 11. Fabrication of steel (A) and plastic (B) fill point spill containers
- 12. Underground tanks of Glass-reinforced plastic (GRP)
- 13. Pipes, underground of Glass-reinforced epoxy (GRE)
- 14. Tank installations for pontoons
- 15. (Re)classification of above ground steel installations
- 16. (Re)classification of above ground plastic installations
- 17. Installation of underground pipes for main areas D, E or F

Main areas

- A. Underground tank installations PGS-Class 1 and Class 2 - PGS 28
- B. Underground tank installations PGS-Class 3 and Class 4 - PGS 28
- C. Underground tank installations chemical products - PGS 31
- D. Above ground tank installations PGS-Class 3 and Class 4 - PGS 30
- E. Above ground tank installations PGS-Class 2 - PGS 30
- F. Above ground tank installations chemical products - PGS 31

Sub-areas

- 1. Soil resistance measurements and design of cathodic protection
- 2. Thermoplastic piping systems
- 3. Flexible metal piping systems
- 4. Leak detection systems
- 5. Level gauging (A) - and level monitoring measuring systems (B)
- 6. Welded joints steel pipes (A) and plastic (B)
- 7. Pressure pipes underground
- 8. Pressure pipes above ground

- 9. Design of tank installations in the (petro)chemical industry
- 10. Tank installations (semi) underground building
- 11. Fabrication of steel (A) and plastic (B) fill point spill containers
- 12. Underground tanks of Glass-reinforced plastic (GRP)
- 13. Pipes, underground of Glass-reinforced epoxy (GRE)
- 14. Tank installations for pontoons
- 15. (Re)classification of above ground steel installations
- 16. (Re)classification of above ground plastic installations
- 17. Installation of underground pipes for main areas D, E or F
