Quality assurance during construction

For the safety of people and the environment

For a secure foundation

So that you can rely on the stability of your wind turbine, we take care of its foundation for you. We ensure the quality of the building materials used as well as the structure and accompany you during the concreting work.

As experts in concrete technology, we are at your side with the following services:

- accompaniment of the foundation construction up to the acceptance of the foundation incl. control of the relevant documents for the acceptance,
- assessment of the foundation before expiry of the warranty,
- repair recommendation in case of detected defects.

**To ensure the quality of your concrete, simply contact our specialists
Mrs Katja Ehrich (katja.ehrich@kiwa.de; +49 172 3597634) or
Mrs Ronny Mendelsohn (ronny.mendelsohn@kiwa.de; +49 151 42225906)
for further information.**
