

# QUALITY LABELS FOR YOUR PRODUCTS

The way to consistent quality

# Quality assurance at the highest level

## YOUR WAY TO VOLUNTARY CERTIFICATION

Due to new developments in Europe with regard to the CE mark for construction products and systems, a large number of long-established building supervisory quality systems are falling away at national level. Nevertheless, as a manufacturer, you want to demonstrate the quality of your products and systems to your customers in a traceable and independently documented manner.

As a long-time certified, approved and accredited inspection and certification body, Kiwa now offers you two systems for voluntary certification making use of private law instruments:

You can prove the high quality, reliability and safety of your products, systems, processes and services to your customers through voluntary certification.

Kiwa labels certify the sustainable quality of your products as part of an inspection and certification process – if necessary, in combination with materials tests.

Voluntary certification by Kiwa makes your high quality standards visible to the outside world. With our quality labels, you receive a certificate of conformity of your products, systems, processes and services for the German and European market. This will provide you with significant added value and thus considerably improve your market opportunities.

### Kiwa quality labels:

- prove the quality assurance of your products
- are a valuable marketing tool
- enable you to stand out from the competition
- create transparency of product quality
- generate trust among your customers

The certification is based on our Testing, Inspection and Certification Regulation (in German: PIZO). For more information on the PIZO as well as the corresponding application form, please visit our website

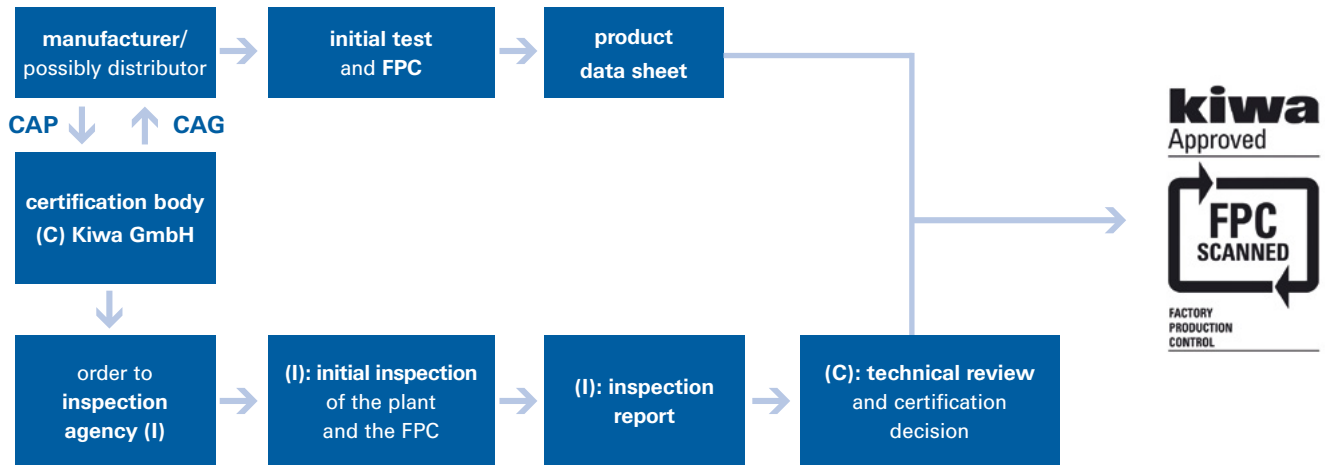

at [www.kiwa.de/Wir\\_ueber\\_uns/Regularien](http://www.kiwa.de/Wir_ueber_uns/Regularien) or contact us directly at [Zertstelle@kiwa.de](mailto:Zertstelle@kiwa.de). We look forward to your enquiry!

Take advantage of our many years of expertise in testing, inspection and certification to get you on your way to assured quality.

# The essentials in a nutshell

## CERTIFICATION OF FACTORY PRODUCTION CONTROL

CAP = certification application / CAG = certification agreement

## PRODUCT CERTIFICATION
