

Regulatory Update

Modular approval no longer sufficient to cover end-products in Brunei

From August 2012, Authority for Info-communications Technology Industry of Brunei Darussalam (AITI) has introduced a new requirement that every host model needs to be Type Approved. Modular Approval would no longer be accepted unless the module will be imported to Brunei as a standalone device.

If multiple host models use the same module, each host model needs to apply for its own Type Approval certificate.
