

Regulatory Update

Type Approval Procedure in India set to change to mandate local testing for Radio, Telecom and ITE equipment

The Department of Telecommunications, Telecommunication Engineering Centre (TEC) in India is considering implementing changes to the current Type Approval procedure to introduce mandatory testing requirements for radio, telecom & IT equipment.

It is understood that TEC will be responsible for issuing final Type Approval, however Conformance Assessment Bodies (CAB's) will be responsible for carrying out testing and issuing reports for evaluation.

The draft regulation, TEC/R/ MTTE/Draft 001, is currently under consult. A final version will be published before implementation. A date for this has not yet been released. A further Regulatory Update will be provided as soon as details are available.
