

Regulatory Update

October 2012

Malaysia

LTE Type Approval

Malaysian Communications and Multimedia Commission (MCMC / SKMM) has announced that LTE consumer devices are permitted to be Approved provided that these can demonstrate full compliance with the relevant ITU, 3GPP and / or ETSI specifications / standards. Where applicable, the generic requirements on safety, EMC, radio spectrum and SAR as specified in the relevant MCMC / SKMM Technical Specifications will also be enforced.

Malaysia's initial LTE deployment will be in 2500 - 2690MHz band, however, MCMC / SKMM expects that manufacturers will wish to Approve multi-band products and will Approve compliant products which also work in other bands that are identified for IMT systems globally.
