

# Regulatory Update - Indonesia

## Paperwork Only Type Approval Process may be re-introduced in 2018

It has come to PCS' understanding that the Indonesian Regulator, *Direktorat Jenderal Sumber Daya dan Perangkat Pos dan Informatika* (SDPPI), are considering introducing a new policy in 2018 whereby a paperwork only Type Approval process will be permitted for all Product Categories.

Currently, a paperwork only Type Approval process in Indonesia is only permitted for Cellular Phones, Handheld Computers, and Computer Tablets. PCS is investigating whether this new proposed policy would run in parallel with the Type Approval process for all other device categories via local testing.

It has not yet been officially confirmed if and when this new policy will be released. If implemented, PCS anticipate that this will come into effect some time in 2018.

PCS will continue to monitor developments closely and will keep customers updated as soon as further updates are available.
