Regulatory Update

Clarification on product types requiring national level Approval in Armenia, instead of Customs Union, have been confirmed.

Further to PCS Regulatory Update in October 2015, on Armenia's adoption and harmonization of Customs Union Technical Regulations on EMC and Safety, it has been further clarified that from January 2nd 2016 national level Approval will be required only for radio equipment and telecommunications terminal equipment falling under HS codes 8517 61 000, 8517 62 000 and 8525 50 000 until further notice. Please be advised that national level Approvals for the below equipment removes the need for CU compliance.

Equipment types falling under HS Codes 8517 61 000, 8517 62 000 and 8525 50 000 are as follows:

- base stations
- sound, image or other data reception, transition devices including switching devices and routers and network equipment
- transmitting equipment and receiving devices

We will continue to update you on any progress or changes in regards to this article.
