Leadax Murphy

STATEMENT BY KIWA

With this Covenant, issued in accordance with the Kiwa Regulations for Certification, Kiwa declares that legitimate confidence exists that the products supplied by

Leadax B.V.

as specified in this product certificate and marked with the Kiwa®-mark in the manner as indicated in this product certificate may, on delivery, be relied upon to comply with Kiwa Covenant manual K15013 dated April 2018.

Ron Scheepers

Kiwa

Publication of this certificate is allowed.

Advice: consult www.kiwa.nl in order to ensure that this certificate is still valid.

Leadax Murphy

1 Scope of the Kiwa Covenant

1.1 Definition of Leadax Murphy

Lead Free Flashing, made of recycled Polyvinyl butyral (PVB)

Specification nominal value:

Length: 5,0 m (other sizes on request)

Width: 15 - 100 cm
Thickness 1,8 mm
Delivered: on roll

Intended use of Leadax Murphy

- Leadax Murphy can be used as a water barrier in (cavity) walls and under casings;
- · At the intersection between chimney bases and roof tiles;
- At chimney flashings to provide a water barrier;
- Leadax Murphy can be applied to the base of dormers and skylights as a waterproofing layer and at the joint between dormer side walls and tiled roofs;
- As a watertight connection between an outside wall and an extension. Use Leadax Murphy masonry clips to attach Leadax Murphy to masonry joints;
- Leadax Murphy can be used as valley gutters and waterproofing on the ridges of (tiled)

1.2 Assumed working life of the waterproofing system

"The provisions and the verification and assessment methods included or referred to in this Kiwa Covenant have been written based upon the assumed working life of the waterproofing system for the intended use of at least the life expectance of the waterproofing system of 25*) years. These provisions are based upon the current state of the art and the available knowledge and experience.

"Assumed working life" means that, when an assessment following the Kiwa Covenant provisions is made, and when this working life has elapsed, the real working life may be, in normal use conditions, considerably longer without major degradation affecting the requirements.

The indications given as to the working life of the construction product cannot be interpreted as a guarantee given by the product manufacturer or his representative or Kiwa Nederland B.V. issuing the Kiwa Covenant, but are regarded only as a means for choosing the appropriate products in relation to the expected economically reasonable working life of the works.

2 Fitness for use

2.1 Meaning of 'fitness for use'

'Fitness for (the intended) use' of the flashing system means that the products have such characteristics that Leadax Murphy, when properly designed and built, satisfies the requirements of this Kiwa Covenant and is fit for its intended use and in this connection satisfies the requirements of this Kiwa Covenant, when properly installed.

2.2 Assessment of fitness for use

The relevant characteristics of the waterproofing system for its fitness for use (requirements) and the required verification methods to be employed are given in chapter 3, as well as the actual performed assessment of fitness for use and proven conformance to the relevant characteristics of the waterproofing system and its components.

3.5 Raw materials

Raw materials are inspected upon arrival according to procedures laid down in ISO 9001:2015 manual per certificate: KSC-K55806/04

3.6 Joint strength

Characteristic	Verification Method	Assessment of the
		characteristic
Peel resistance – hot air joint:		
Length direction	EN 12316-2	60 N/50mm
Width direction	EN 12316-2	55 N/50mm
Peel resistance – Leadax High-Tack	joint:	
Length direction	EN 12316-2	220 N/50mm
Width direction	EN 12316-2	170 N/50mm
Shear resistance – hot air joint::		
Length direction	EN 12317-2	420 N/50mm
Width direction	EN 12317-2	900 N/50mm
Shear resistance – Leadax High-Tad	ck joint:	
Length direction	EN 12317-2	490 N/50mm
Width direction	EN 12317-2	900 N/50mm

3.8 Chemical resistance

on on mountained		
Characteristic	Verification Method	Assessment of the
		characteristic
Chemical resistance to lime milk	EN 1847	Pass
(Ca(OH) ₂)		

3.9 Compatibility

Characteristic	Verification Method	Assessment	of	the
		characteristic		
Compatibility with bitumen	BRL 1511-1	Pass		
Compatibility with PVC	BRL 1511-1	Pass		

4. Initial inspection and continuous surveillance by Kiwa

4.1 Initial inspection

During an initial inspection the IQC-scheme is audited, testing is witnessed and samples are taken for verification. Continuous surveillance will be performed two times a year, during which the process, the IQC-scheme is inspected.

UV-resistance		once per 5 years
Water tightness	EN 1928 - B	
Peel resistance of joints	EN 12316-2	once per 5 *) years
Shear resistance of joints	EN 12317-2	once per 5 *) years
Chemical resistance	EN 1847	once per 5 *) years
(Lime milk)		· ·
Compatibility with bitumen	BRL 1511-1	once per 5 years
Compatibility with PVC	BRL 1511-1	once per 5 years

^{*)} In case of unchanged materials and or unchanged production process the frequency may be expanded to 10 years.

5. Conditions under which the fitness for the intended use is assessed

5.1 Manufacture of the product

Leadax Murphy is produced from a combination of materials according to written specifications as documented in the formulation. The formulation is part of the IQC-scheme and of the audits performed by Kiwa.

The production facility is situated in Wapenveld, The Netherlands.

The product is produced in rolls:

- Nominal thickness 1,8 mm;
- Nominal length 5 m;
- Nominal width 15 100 cm;
- Each roll shall carry a batch number;

Page 5 of 6

Leadax Murphy

 Each roll shall carry the Kiwa word mark: Kiwa, the certificate number or the applicable logo.

5.2 Application instruction

For current application instructions refer to the packaging.

5.3 Recommendations for customers

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact: Leadax BV and, if necessary, Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
