consists of initial and  
regular inspection of:

- quality system
- process

## Transport of drinking water chemicals

---

### TECHNICAL SPECIFICATION

#### General description of the process

The process comprises the transport of drinking water chemicals by the carrier from a production site to the treatment plant of a drinking water production company.

#### Process specification

The certificate K-0225428 concerns the transport of chemicals in tankers

- magnesium chloride solution

### RECOMMENDATIONS FOR THE CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- Schüssler Novachem GmbH
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
