Certification process
consists of initial and
regular inspection of:

- quality system
- process

Application of coating systems on metal substrates for drinking water applications

PROCESS SPECIFICATION

General

The application of coating systems for drinking water in accordance with BRL-K746.

Additional specification

Application of powder coatings to the interior and exterior of new and existing pumps, pipes, fittings, etc.

The coating to be applied should be certified for drinking water applications according to Kiwa evaluation guideline BRL-K759.

Method of application: Dip coating in a fluidized bed and Electrostatic Spraying

APPLICATION AND USE

The process involves the application of powder coatings according to:

- BRL-K746: Application of coating systems for drinking water;
- Additional requirements of the customer;
- Instructions of the coating manufacturer.

RECOMMENDATIONS FOR CUSTOMERS:

Upon delivery, inspect whether:

- what was agreed was delivered;
- the output of the process shows no visible defects.

If you decide to reject the project on the basis of the above, please contact:

- Kersten Kunststofcoating B.V.
and if necessary with:
- Kiwa Nederland B.V.

For the correct method of storage, transport and processing, consult the processing instructions of the certificate holder
