Electronic tapware

GENERAL

The specified products were not yet assessed for compliance with all hygienic aspects as inserted in the “Drinkwaterbesluit” (Drinking Water Decree) and outlined in the “Regeling materialen en chemicaliën drink- en warm tapwatervoorziening” (Regulation for Materials and chemicals in drinking water and warm tap water supply), implemented 1 July 2017, as specified in clause 4.2 of the Kiwa guideline BRL-K14018/02.

APPLICATION AND USE

The electronic tapware are intended for application in drinking water installations with a static pressure of maximum 1000 kPa and a maximum water temperature of 90 °C.

The recommended limits for correct operation are a dynamic pressure between 100 kPa and 500 kPa and a water temperature of maximum 65 °C.

MARKING

The Kiwa[®]-mark products are marked with the wordmark “KIWA”.

Place of the mark: on the body.

Compulsory specifications:

- name or mark of the manufacturer: on the body;
- indication of the acoustic group, if classified: on the body;
- indication of the flow rate class, if classified: on the body;
- Indication for temperature selection.

Method of marking:

- non-erasable;
- visible after assembly.

RECOMMENDATIONS FOR THE CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- Grohe AG
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier’s processing guidelines for the proper storage and transport methods.
