

Regulatory Intelligence

Keeping up to date with regulatory news and developments is a challenging and time-consuming task. PCS is dedicated to the importance of such tasks, and we can offer manufacturers a standard or bespoke solution for any research and regulatory intelligence needs.

The PCS team has a wealth of expertise spanning across multiple technologies, frequencies ranges and product types. This enables us to act and respond quickly to both manufacturer inquiries at product development stage, and regulator queries during both the initial research phase and also the Type Approval review process.

Regulatory Updates

The worldwide Regulatory environment requires constant monitoring in order to ensure that new regulations or proposed changes can be identified as early as possible and their impact fully considered. PCS sit at the forefront of such changes, bridging the gap between the Regulator and our customers and providing insight into Regulatory changes across the globe.

As any company which has been affected by a significant regulatory shift will know; fast, reliable and frequent updates can make the difference between compliance and failure to meet the required standard. PCS provide this advice free of charge to our customers, and are later published on our website. [Regulatory updates](#) are issued whenever news is learnt that might impact them, as soon as that news is learnt, and until the change has been completed.

To sign up for free regulatory updates and receive them without delay, or to request a quotation [please contact us](#).

Industry Seminars , Conferences and Lobbying

Attending seminars and conferences as well as visiting key regulators is a great way of keeping up to date with changing regulations, seeing what's going on behind the scenes and more importantly allows you the opportunity to voice your own opinion on issues that will affect your company and your future products.

However, as we know, these demands can be all too frequent and can each require several days of your valuable time. PCS can

solve this problem for you. We are happy to attend such events or arrange meetings with key regulators on your behalf. As with our offering for research and regulatory intelligence, we can tailor such activities to suit your needs and deliver feedback in the expected format - ensuring your compliance needs are met and delivered as expected.

PCS are conveniently located for easy access to all major European and Asian cities, and are happy to travel to internationally on your behalf.

Wide range of Radio, Telecom, and ITE devices and consumer Electrical & Electronic Device for testing and certification

A few example of products to obtain Radio (RF), Telecom and ITE Type Approval:

- Consumer Electronics
- Vehicle Telematics
- Wireless Industrial Electronics
- Internet of Things
- Network and IT equipment
- WLAN, Bluetooth, UHF RFID & Short Range Devices
- Cellular Radio
- Fire Alarm Systems
- and many more Radio, Telecom, and ITE devices and consumer Electrical & Electronic Devices

Testing and certification standards

The following testing and certification standards are included in our services:

Testing

- RED Europe
- FCC USA
- ISED Canada
- MIC Japan

Radio Certification

- European Notified Body (RED, EMC, MED, CPR)
- FCC Certification (TCB)
- Canada ISED Certification
- Japan MIC Certification

Global Market Access
