

BRL-K780/04 Flexible metal pipes

This Evaluation Guideline is intended for pipes which are used for transporting:

- Liquid fuels of the types K1, K2, K3 and vapors released from them;
- Compressed gases (optionally in liquid form) such as LPG, propane, butane;
- Manufacturer specified other liquids the internal pipe material can withstand.

For whom?

Evaluation Guideline BRL-K780/04 is intended for suppliers and producers of flexible metal pipes and (tank) installation companies.

When is it necessary?

Evaluation Guideline BRL-K780/04 is intended for suppliers and installers of components for installations used to transport flammable and non-flammable liquids, which in most cases are environmentally threatening to water and soil.

If required, these pipes are installed by an installation company that is certified in accordance with Evaluation Guideline BRL SIKB 7800/BRL-K903 "Tank installations". For use in LPG installations, installation takes place in accordance with Evaluation Guideline BRL-K901 "Regeling Erkenning Installateurs tanks en leidingen voor drukhoudende opslag van LPG, propaan, butaan, DME en aardgas (REIP)".

Interested?

If you are interested in certification, please complete the application form. If you have any questions, please contact our sales office.

Note: This Evaluation Guideline is only available in Dutch.
