

EAD 330030-00-0601 – Fastener of external wall claddings

If you are a manufacturer or supplier of fasteners of wall claddings and you trade these products within Europe, you can choose to certify your products CE.

You can find more general information about CE on our CE Kiwa page.

Why Kiwa?

Kiwa can provide you with CE certification. This means that we perform the initial type tests for you and have a European Technical Assessment (ETA) written if you do not already have it and then perform an initial assessment to assess your factory production control. After admission, we provide a certificate and supervise you regularly (1x a year) to assess whether you still meet the requirements.

At Kiwa you are assured of a qualitative and constructive service.
