

Electric Car Charging Infrastructure

Electric mobility is constantly evolving – the rise of electric vehicles and the growth of intelligent technologies are paving the way for how people and goods will be moved in the future. Kiwa provides a complete EV charging testing and certification solution from compact high-quality AC wallboxes to reliable DC fast charging stations.

Kiwa – Your partner for eMobility

To ensure that electromobility is accepted and disseminated on a mass scale, the charging stations must meet the highest standards and norms: they must not only be robust, safe and flexible but also be easy to integrate into the existing infrastructure. Whether you are just starting to decarbonize or electrify your fleet, come and see how Kiwa helps its customers with the right technology and know-how.

Kiwa's commitment to making an integral, functional contribution to mobility goes deep - from the conversion to electric vehicles to the creation of safe and reliable charging infrastructure. Thanks to our extensive accreditations in the field of eMobility, Kiwa is your partner for testing your devices and thus an important partner for proving that your devices conform to standards.
