

Electrical safety testing / CB certification

Kiwa is an accredited test house for several electrical safety, and EMC standards. The Kiwa test laboratories, located in different countries (CBTL's) are linked to the Kiwa NCB, located in the Netherlands.

Kiwa can provide the following services for electrical products: Testing and certification according to the IEC scheme, Testing and Certification for North America (in cooperation partners like CSA, QPS, LC), CCC mark (China) and GostR/EAC Certification (Russia).

The scope applies to Cont(rols), HOUS(ehold appliances), EMC, MEAS(urement systems), MED(ical equipment), OFF(ice equipment) and PV (Solar panels).

Testing facilities for electrical and electronic products are based in the Netherlands, Germany, Italy, China and United Kingdom. Let us deal with your testing and certification issue. We will be happy to provide you with any information you might need, so please contact us!
