

T 014 (A) Technical note (Belgium market)

The T 014 consists of the general requirements for testing security products specific for the Belgium market. The T 014A technical note is specific for parts of intrusion alarm systems that make use of wireless connections.

This technical note is not based on or related to the EN 50131 series. The T 014(A) refers to the EN 50130-4 and EN 50130-5 standards for environmental and EMC tests.

This technical notes applies to all the different types of components used as part of an intrusion alarm system installed in a building.

Manufacturers or distributors of security (intruder or hold-up) products who want to bring such a product on the Belgium market.

Only with a certificate it can be proved that a component used as part of a intrusion alarm system is compliant to the T 014(A) Technical note. Normally a INCERT certificate for the T 014(A) part will be issued after the testing has been successfully completed. A certificate for this product provides you market access specific for the Belgium market.

If you want more specific information for your organisation, please fill out the contact form on our website or contact us by phone or email. We will inform you about the information required in order to make a quotation according to your needs. After this we will set up a plan according to your needs and requirements.
