

Kiwa can offer either independent accredited verification or consultancy services of your organisation's greenhouse gas emissions under CCA, EU ETS or other local or National schemes (such as The Netherlands 'carbon ladder').

These services are for organisations who have a requirement to report their emissions.

This includes both voluntary schemes and emissions reporting that is required by law.

We can help you save money. Verification will help identify measures for energy saving, environmental gains and/or process improvements offering tangible benefits.

We are a UKAS-accredited Verification Body for EU ETS (No. 0217)
