

Global Certification

With many years of experience, Kiwa offers smooth and quick testing and global certification services. Having labs in many countries we work on offering our services locally. Kiwa has fully equipped and accredited test facilities to support your certification desires for the global market.

Besides testing for certification purposes, Kiwa offers their extended and state-of-the-art laboratory facilities for a wide range of on-demand testing (pre-assessment tests, feasibility tests, endurance, benchmarking, etc.) Tests can be done at complete systems, products and materials.

- Accredited test laboratories for fully gas and/or electrically powered equipment;
- Partners with CSA, QPS, NSF, EPA, LC, SAI Global, Global Mark, KGS, CCGas, TSE, etc.;
- Various lab accreditations, depending on certification scheme;
- Full scope accredited laboratory in the Netherlands

Kiwa offers direct access to the global market by being notified by international authorities and Certification Organizations. Multiple international standards and certification schemes are listed at the accreditation scope of Kiwa.
