

H009 Service and Maintenance Training

Who is the HETAS H009 Service and Maintenance course for?

This HETAS-certified course covers the service and maintenance of solid fuel stoves.

This course is designed for chimney sweeps and heating engineers (typically working for housing associations) looking for a formal qualification to allow them to service and maintain solid fuel stoves. If you are already registered as an installer, but would prefer only to service and maintain, then this is also the qualification for you.

What are the entry requirements for the HETAS H009 course?

This course is suitable for:

1. candidates already holding a H003 qualification, but not wishing to continue to Install appliance, or
2. Chimney sweeps who hold registration with one of the approved Sweep Schemes, or
3. Operatives working in Social Housing, needing to service and maintain existing installations.

How long does the HETAS H009 course take?

1.5 days. A combination of training and assessment delivered throughout the duration, with emphasis on plenty of hands-on Training.
