

## Solid Fuel Appliance Testing

**We operate an unrivalled testing facility for manufacturers of wood and mineral fuelled appliances. For over two decades we have been helping manufacturers to address their responsibilities under the legislation affecting solid fuel fired appliances.**

This service is for solid fuel stove manufacturers.

Since 2013 it has been mandatory for many domestic products to be tested under the Construction Products Regulations.

Appliances include:

- Open fires (to EN 13229)
- Closed roomheaters (to EN 13240)
- Free standing boilers (to EN 12809)
- Cookers (to EN 12815)
- Pellet Roomheaters (to EN 14785)
- Slow heat release appliances (to EN 15250)

We also offer a complete test solution for:

- DEFRA smoke exemption
- RHI certification
- MCS accreditation services
- Electrical safety (EN 60335-1)
- Electromagnetic Compatibility

It is also mandatory for automatic boilers (over a certain output) to comply with the Machinery Directive. We provide a complete service for:

**Kiwa N.V.**  
info@kiwa.nl  
+31 (0)88 998 44 00

- Testing to EN 303-5
- RHI emissions certificates
- Smoke exemption
- We have on-site and laboratory test capability

We are also accredited to test to the standards covering pellet stoves and boilers.

We work closely with HETAS to ensure that compliant products are listed within their Official Guide.
