

PAI International Pig Scheme

The PAI International Pig Scheme is an NEN-EN-ISO/IEC 17065 accredited scheme owned by Kiwa Agri Food.

The scheme enables international pork producers (Ireland and main land Europe) to obtain an approved level of production within EU legislative requirements by proving that standards of animal health, welfare and sustainability on farm are met.

It is designed to ensure that international pigmeat production has been achieved with comparable and measurable high standards in animal welfare, food safety and traceability in line with that from the United Kingdom.

These assessed and verified standards are intended to provide full retailer and consumer confidence in the product line being produced and each site is independently assessed on an annual basis.

This certification provides a one-stop shop to evidencing that sites are not just compliant with all EU legislation but also addresses other areas currently covered by UK standards.

Customer Benefits

Availability - We answer the phone: so give us a call using the contact details to the right (or drop us an email)

Experience - Kiwa Agri Food is the most experienced UK agricultural Certification Body

Scope - Kiwa Agri Food carries out the necessary approval work for a wide range of suppliers from very small local firms to the big nationals
