

BRL-K21028 Single walled flexible plastic storage tanks with an integrated steel spill container

Single walled flexible plastic storage tanks with an integrated steel spill container for the storage of PGS Class 2 to 4 liquids. Due to their flexible nature, these tanks (fully) enclose the stored medium causing a reduction in the formation of liquid vapors. This reduces their emission into the atmosphere. Also, the reduced contact with air reduces the degradation in quality of the stored liquid.

For whom?

Installers of storage facilities

When is it necessary?

Companies covered by the Activities Decree (Activiteitenbesluit = BARIM) are legally required to have their storage installation to be installed by an installer certified in accordance with BRL SIKB 7800/BRL-K903. A certified installers must submit an approved RI&E (Risk Inventory & Evaluation) before a certificate in accordance with BRL SIKB 7800/BRL-K903 can be issued. The tanks and spill containers required for the storage of PGS Class 2 to 4 liquids will be part of this RI&E.

The RI&E of each installation can be streamlined when use is made of certified components. In such cases, the RI&E aspects related to the certified products, are not required. Storage tanks and spill containers, manufactured according to the requirements of BRL-K21028, will be in accordance with the requirements of the BARIM, RARIM and BRL SIKB 7800/BRL-K903.

Interested?

If you are interested in certification, please complete the application form. If you have any questions, please contact our Sales Office.
