

Inspection Burglary Protection; let Kiwa R2B prepare your Inspection Plan

Who poses a potential threat, which goods or valuables do they target, what protection does your current security offer? The experts from Kiwa R2B can assist you in identifying risks and oversee implementation of measures that will satisfy your security needs.

As an inspection body, Kiwa R2B assesses your security to be implemented, independent from suppliers, security companies and other parties in the market. We prepare an Inspection Plan based on basic assumptions determined by yourself or third parties. This specific and brand-independent plan contains all details and criteria against on the basis of which your security is inspected and assured that comparable and competitive offers can be requested.

During the implementation process, Kiwa R2B can support by assessing security design and conducting intermediate inspections. Ultimately, a final inspection provides certainty about the security's effectiveness. The combination of all organizational, structural and technical measures is assessed during this inspection based on the approved Inspection Plan. Results are summarized in an inspection report.

Security measures are often part of insurance requirements. Kiwa R2B checks the security's effectiveness annually during follow-up inspections based on the requirements. Results are summarized in an inspection report.

Why Kiwa R2B?
