

## Domestic to Commercial Gas Safety (CoDNC01)

### What experience do I need to do the CODNC01 Gas Changeover Course?

This Cert-ain-accredited gas changeover course is for experienced engineers who already have the CCN1 Domestic Gas Safety qualification, wanting to expand their skills to do commercial gas work.

Once you have completed this Commercial Gas Changeover course you can take the appliance modules for commercial gas:

- ICPN1 - Installation 1st Fix Commercial Pipework
- ICAE1 - Installation 1st Fix Appliances
- CIGA1 - Commission Repair Service Indirect Fired Plant
- CDGA1 Commission Repair Service Direct Fired Plant
- CORT1 Commission Repair Service Overhead Radiant Heaters
- TPCP1/1a Testing Purging to IGE/UP/1/1a
- CDGA1 Commission/Repair of Indirect Fired Appliances

### What are the entry requirements for the CoDNC01 Commercial Changeover?

This Commercial Changeover course can only be completed by engineers holding a valid CCN1

### How long does it take to do the CoDNC01 Commercial Changeover course?

This course takes 3 days to complete.

#### Please note:

- All candidates who wish to undertake gas training and/or assessment must produce evidence of their qualifications.
- Candidates must produce previous certificates as demonstrable evidence prior to reassessment.
- Candidates can undertake reassessment of any module up to 6 months early without losing any time.
- Reassessment must take place within the 12 months following the expiry date. It is illegal to install gas appliances without a valid qualification
- Any candidate undertaking gas assessment for the first time must complete a training programme.
