

Construction Materials Testing

Kiwa CMT is a materials consultancy, testing and investigation facility with over 44 years of service to the construction, civil engineering, environmental and associated industries. We can assess virtually any material used in modern day construction.

Our testing services also include [Structures](#), [Geotechnical](#), and [Waste Advice](#).

We provide testing services for construction and civil engineers, highways and local authorities.

Our laboratories cover slip resistance testing, tensile strength, workable life, flow and setting time of concrete products, concrete cube testing, additives, admixtures and pigments; evaluation of concrete repair and cement materials.

We use internationally recognised BS, BSEN, ASTM and DIN standards alongside in-house methods.

Please see the UKAS website for our [scope of accreditations](#).
