

Gas Meters

The original "Gastec" meters are fast becoming an industry standard. Development engineers love the fact that they are able to monitor gas inputs accurately, in real time.

Most of the meters we provide are in the domestic range [0.5 to 47kW]. We have over 50 customers in the UK and are always happy to supply larger meters [up to 400kW].

These meters are usually bought by designers and manufacturers of gas appliances.

We also provide a range of connections, support frames and a full calibration service.

All of our gas meters can be bought or rented.
