

Micro-CHP MCS Certification

Kiwa provides MCS certification for heat led Micro-CHP ([MCS 014](#)) and electricity led Micro-CHP ([MCS 015](#)) packages designed for single dwellings as the primary heating system, where the package:

- has thermal and electrical outputs of less than 45kWt or 50kWe respectively.
- is fuelled by any of the following – second and third family gas; gas from a bespoke source; hydrogen; mineral oil; other liquid fuels, principally bio-oils; other fuels including unconventional fuels and solid fuels.

This service is for the manufacturers of micro-CHP products. To apply, please complete this MCS certification application form.

Applicants must have:

- an attributable, independently verified, energy performance report produced from the comprehensive set of test conditions detailed in PAS 67 appropriate for the intended application of the micro-cogeneration package.
- a full set of data produced from the annual energy performance evaluation method for micro-cogeneration packages recorded in the Product Characteristics Database.
