

Solid fuel Installer Training

We are an established training centre specialising in solid fuel, gas and oil installer training. We offer a full range of HETAS courses for those who want to install, maintain and service dry or wet solid fuel appliances into domestic properties. Refresher courses are also available.

Please note: it is a mandatory requirement for all Competent Persons Schemes that registrants working under any scheme operator such as HETAS, renew their competencies every 5 years by law. HETAS has developed refresher courses for all their certificated courses.

Our impressive [solid fuel](#), [gas](#) and [oil](#) training facilities in Cheltenham enable you to train on a range of appliances from different manufacturers, so that you are familiar with the various boilers, heaters and cookers that you'll come across in your day-to-day work. We also deliver [I-GAS](#) courses.

Once you have passed your qualification, you can register with HETAS.

See below for more details about our solid fuel installer courses.
