of your  
**Products**

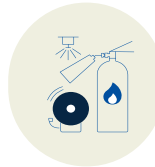

# Kiwa Services for *Industrial Product Certification*

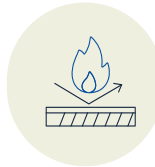

Kiwa activities in the field of Industrial Product Certification are summed up in terms of Safety, Environment and Performance.

The strong point of the work carried out for Product Certification is represented by the **synergy of various services** that enable satisfactory assessments.

These assessments are already integrated from the design phase of the product, carefully taking care of developments in relation to the **applicable Regulations and Standards**.

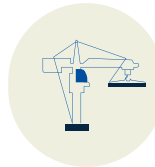

Testing and Certification Services for **Gas Appliances**

Testing and Certification Services for **Solid Fuels Appliances**

Testing services for **Electrical Safety and Electromagnetic Compatibility**

Testing and Certification Services for **Construction Products**

Testing and Certification Services for **Water Appliances**

## Mandatory Certification

- **2014/32/EU** - Measuring Instruments Directive (MID)
- **2014/68/EU** - Pressure Equipment Directive (PED)
