

Stronger security, greater
confidence. ISO/IEC 27001

kiwa

ISO IEC 27001

ISO/IEC 27001 certification

Information security has become a key business requirement. Clients, market authorities and international partners increasingly expect organizations to protect sensitive information in a structured and reliable way.

ISO/IEC 27001 is the internationally recognized standard for information security management systems. Certification demonstrates that your

organization manages information security risks, protects confidential data, and applies recognized security controls and management practices.

Certification helps to increase trust, improve control of sensitive information, reduce cybersecurity risks and support compliance with legal and contractual requirements. It also supports participation in international tenders and supply chains.

Why choose Kiwa?

Kiwa provides independent and professional certification services based on competence, impartiality and practical understanding of the industry.

Our auditors combine expertise in management systems, industrial operations and regulatory expectations to deliver reliable and business-oriented certification processes.

We support organizations throughout the certification process with a clear, structured and internationally recognized approach.
