

BRL K536 E Plastic piping systems of PE-X/Al for hot and cold drinking water

The products according BRL K536 E are applicable for piping systems distribution systems for hot and cold drinking water at a design (working) overpressure of 8 or 10 bar according the temperature profile table 1.

The products according BRL K536 E are applicable for piping systems distribution systems for hot and cold drinking water at a design (working) overpressure of 8 or 10 bar according the temperature profile table 1.

Tabel 1. Temperature profile during 50 years

	Temperature [°C]	Time	Overall service coefficient
T _{design}	70	49 years	1,5
T _{max}	80	1 years	1,3
T malfunction	90	100 hours	1,0

Remark: the mentioned temperature profile is in accordance with class 2 of ISO 10508.
