

## Maximum flow rate safety valves

The requirements in this approval requirement are applicable to maximum flow rate safety valves for gas installations, whether or not consisting of a composite product, that are suitable for a maximum operating pressure of 100 mbar natural gas.

### For who?

Manufacturers, grid companies, representatives, retailers, constructors and in installers.

### Process steps

An approved quotation is the beginning of a tested and an approved product. The most important steps are:

- Initial product assessment: the assessment to determine if all requirements in the approval requirement are met.
- The result is a certificate upon which is mentioned to which requirements the product complies.
- Product verification: the assessment performed after granting certification to determine that the certified products still comply with the requirements in the approval requirement.
- Control on quality system requirements: control on following the IQC scheme (as described in the approval requirement) and the procedures.
