

Technical rubber products are often made according to customer-specific wishes and designed for special applications. As a manufacturer, you face many challenges in product design, specific rubber compounds, small series and special production techniques. Nevertheless, your customer demands high quality products. And then the challenge really starts ...

You are...

Are you a designer, producer or user of technical rubber products such as bridge supports, fenders, compensators, rubber textile products or rubber-metal products? That can be at all stages of development and use. Then of course you want the best technical support.

Or are you a purchaser or end user of technical rubber products and are you looking for confirmation of quality and reliability?

We provide many services in the field of technical rubber products:

Our Rubber department delivers many services in the field of rubber engineering products:

- specific testing of bearings or fenders or other products, like compression characteristics
- testing of physical-mechanical properties of rubber-metal and textile reinforced products
- failure analysis
- service life prediction for specific applications
- independent arbitrations
- consultancy with respect to specifications and requirements for specific applications
- material selections
- inspections and guidance on location
- quality control and validation
- certification

For approvals and certification (CE) of elastomeric bridge bearings we will bring you in contact with the Kiwa Department that is Notified Body for these products.

Independent advice

It is important for you to know that our Kiwa Technology division operates as a separate company, independent of the Kiwa Group's Certification Divisions.

About Kiwa

Kiwa has specialized business units that focus on specific market segments, in the Netherlands and internationally. We offer specialist services in areas such as energy and water, fire safety and security, infrastructure, roof and facade advice, sports facilities and training. You can contact these business units for testing, inspection, certification, training and consultancy tailored to your market segment.
