

Security Audit - Have the Security of your Organization Assessed

Every day your organization is threatened by risks of various kinds. How does your organization protect itself against it? Companies are often convinced that their implemented security measures are sufficient, only to discover after an incident that security is less secure than expected.

The professionals at Kiwa R2B can help you investigating the flaws. A security audit will provide an insight into how you have created coherence in your security measures and where there are overlaps or potential gaps.

Our security experts analyze the risks, identify the physical measures taken, assess the organizational provisions and interview people involved.

Based on this, Kiwa R2B assesses the security of your organization, identifies bottlenecks and provides you with measures that facilitate an undisturbed continuation of your business.

Why Kiwa R2B?

Kiwa R2B is a leading Inspection Institution in the area of Fire Safety and Security (FSS), providing services with expertise, flexibility, customer-focus and innovative attitude. We conduct inspections and provide training maintaining our fully independent, unbiased and fair position.
