

Training ATEX for Manufacturers

Do you work as a developer or quality assurance (QA) manager on products that are covered by the ATEX directive 2014/34 / EU? Then follow the course ATEX for manufacturers at [ATEXcertificaat.nl](https://www.atexcertificaat.nl). Here you learn everything about ATEX and IECEx product certification trajectories.

Training information

You can enregister for this training via [ATEXcertificaat.nl](https://www.atexcertificaat.nl) (in Dutch).

The ATEX training for manufacturers is intended for developers or quality assurance (QA) managers who work on products that are covered by the ATEX directive 2014/34 / EU. Participants must have basic knowledge of ATEX. The e-learning ATEX Awareness, which is also offered by [ATEXcertificaat.nl](https://www.atexcertificaat.nl) is a good basis. You can also check whether the training is of added value to you during an intake interview.

During the training ATEX for Manufacturers you will learn how to guide the certification process of products that fall under the ATEX guidelines. Although the emphasis is on certification for EU countries, certification for USA and Canada is also discussed. In addition, the training is an ideal preparation for course participants who want to make an in-depth assessment when it comes to relevant standards and specific interpretations. The latter can also be designed by [ATEXcertificaat.nl](https://www.atexcertificaat.nl), with additional tailor-made training.

[ATEXcertificaat.nl](https://www.atexcertificaat.nl)'s ATEX for Manufacturers training is provided by an professional trainer with practical experience in the field of the ATEX Directive 2014/34/EU and IECEx. During the training the following topics will be discussed:

- Protection methods and associated standards;
- CE conformity modules and the responsibilities of the manufacturer;
- Practical examples of products with combined protection methods and possible ATEX / IECEx codes;
- Certification of an assembly of certified products;
- Explanation of the possible test programs, with a guided tour in the laboratory;
