

IWI-C International Welding Inspector

IWI-B (Basic level) is the course for you if you need to qualify as a welding inspector and wish to learn how to fill the important role as a welding inspector within different applications and for different industries.

The course is based on IAB-195r4-20.

The course will be held during fall 2021. Sign up to the waiting list if you wish to be notified when the dates are ready.

Training information

Hvem passer kurset for?

IWI-C (Comprehensive level) is the course for you if you need to qualify as a welding inspector and wish to learn how to fill the important role as a welding inspector within different applications and for different industries.

What will you learn?

A candidate completing the "Comprehensive" level of training under this programme shall possess an intimate knowledge of welding and inspection theory and application. This knowledge base will enable the candidate to perform the following tasks (in addition to the IWI-S and IWI-B):

- Manage the whole of the Welding Inspection activities
- Supervise the activities of the IWI-S and IWI-B
- Develop and provide instructions to IWI-S and IWI-B
- Act as a technical expert for the Inspection function
- Develop, comment and review Quality Control Plans and Inspection Testing Plans for applications not covered by product standards, codes, specifications, drawings and regulatory requirements

**Kiwa Academy
Norway**
kurs@kiwa.com
+47 934 48 987

- Manage inspection activities for non-conventional applications with reference to materials, processes, and advanced destructive testing and NDT techniques (see *Section 1 for detailed information*)

Language

The course will be conducted in English and will be conducted interactively with an available KIWA trainer.

Online training - a sustainable choice

The course is conducted online and gives you the flexibility to combine work, family and skills development while the cost is reduced to a minimum.

The course leader will be available throughout the course to ensure that you have a correct understanding of the curriculum and to guide you through the project assignment that will be performed by the student simultaneous as the professional input is acquired.

Course content

The course consists of 2 sections WT (Welding Technology) and WI (Welding Inspection). WT consist of 4 modules, and WI is 3 modules.

Certificate

After passing the course, you will receive an international WI-C diploma. This certificate will make it possible to work in many countries and industries in the world as a welding inspector if it is supported by the manufacturing specification.

Why choose Kiwa?

- Experienced course leaders
- When you pass the course you will receive an International diploma that allow you to work all over the world
- Time and cost efficient
- Flexible
- Sustainable
