

FAMI-QS is a preeminent global Quality and Feed Safety Management System for the sector of Specialty Feed Ingredients. A Specialty Feed Ingredient is defined as any intentionally added ingredient, not normally consumed as feed by itself, whether or not it has nutritional value, which affects the characteristics of feed or animals/ animal products and animal performance. The FAMI-QS code addresses safety, quality and regulatory compliance in order to minimize hazards and ensure the placing on the market of safe and legal Specialty Feed Ingredients. FAMI-QS is operating under IAF MLA.

Key Features

HACCP

Monitoring

Transparency

Process Approach

Market Access: Facilitating exchanges at interational level

Support the safety of Feed/Food across the value chain

Regulatory compliance

Global Feed Safety Management System

Code

The FAMI-QS Code is aligned with ISO High Level Structure for Management Systems, allowing Operators to maintain an integrated Management System. The administration of the Code is in the hands of FAMI-QS Asbl, a non-profit organization, that coordinates the certification process in partnership with qualified Certification Bodies (CBs). In order to assure harmonization, impartiality and good competence, FAMI-QS Asbl runs regular training sessions and a Surveillance Programme by means of which our staff monitors the on site activities of the auditors.

New Features

Scope

FAMI-QS covers the production/ trade of Specialty Feed Ingredients coming out from the following production processes:

Chemical; Bioprocessing; Mining; Extraction; Mixing; Formulation.

Process documents - HACCP Support

Dedicated HACCP plans for processes under the scope are available, in order to support Operators implementation of their HACCPs.

Food Manufacturing Practices

Dedicated chapter for Good Manufacture Practices aligned with ISO/TS 2003 – Part 6 and FSMA CGMP Animal Food.

Regulatory Compliance

To assist our members in developing a credible regulatory compliance management system, FAMI-QS created a Guide for

Managing Regulatory Compliance System and a supporting document providing regulatory requirements to place specialty feed ingredients on some relevant markets.

Rules

Details of the FAMI-QS Certification System, outlining the way it operates.

Crisis Management Procedure

Proper assurance of feed safety worldwide is the highest priority for FAMI-QS. A “Feed Safety Incident and Crisis Management Procedure” is available and mandatory for all Operators

Go here for the [Code](#) and [Rules](#) for Operators.
